CHANNEL MAINTENANCE DREDGING

TENTATIVE SCHEDULE, OHIO RIVER

Notice is given that on or about 18 October 2021, Amherst Madison, contractor for the US Army Corps of Engineers, will commence channel maintenance dredging on the Ohio River in the upper approach to Captain Anthony Meldahl Locks and Dam, Ohio River, Mile 436.2. The nearest known downstream municipal water intake is at Cincinnati, OH, Ohio River, Mile 462.9. Approximately 12,000 cubic yards of material will be dredged at this location. Successive dredge sites, mile points, dates, quantities, and nearest downstream municipal intakes are listed below. Disposal operations will take place at the permitted sites for each location.

The contractor's floating plant consists of the M/V KEITH A BLOUNT, the M/V BUS BROWN, two barge mounted cranes, and four material barges. The M/V KEITH A BLOUNT and the M/V BUS BROWN will be monitoring marine channel 13. Dredging will be performed from 6:00 AM through midnight, 7 days per week. A government dredge inspector will be in attendance at each site. Navigators are requested to be alert to the location of the dredge and its disposal operations. It is essential that navigators await the passing signal from the dredge prior to proceeding with caution. During non-working hours, all equipment will be moored outside the navigation channel, marked and lighted according to regulations.

<u>Site</u>	<u>Approximate Commencement Date</u>	<u>Estimated Quantity (CY)</u>	<u>Nearest Downstream Municipal Intake</u>
Shawnee State Park Marina Ohio River Mile 363.1	Oct 21 - 22	2,000	Manchester, OH Ohio River Mile 404.5
